What's On TV note:

"Dr John Rae, former headmaster of Westminster School, assesses the implications of Kamuzu Academy, the Eton school of Africa."

No further information currently available. It perhaps begs the question whether Africa really needs an incubator of privilege and class elitism in the first place, when half the continent remains illiterate. Are the fees as high, one wonders?

See subject index under **AFRICA, DOCUMENTARIES** and **PUBLIC SCHOOL / BOARDING SCHOOL**. In particular, "**Only Human: Eton Boys**" examined the new-look Eton college and its efforts to adapt to the times.
